

**“ YOU CAN BE A GOD FOR
UPTO 50 PERSONS ”**

Don't let these Myths confuse you:

MYTH : If you agree to donate your organs, the hospital staff won't work as hard to save your life.

FACT : When you go to the hospital for treatment, doctors focus on saving your life — not somebody else's. You'll be seen by a doctor whose speciality most closely matches your particular condition.

MYTH : Maybe I won't really be dead when they sign my death certificate.

FACT : Although it's a popular topic in the tabloids, in reality, people don't start to wiggle their toes after they're declared dead. In fact, people who have agreed to organ donation are given more tests (at no charge to their families) to determine that they're truly dead than those who haven't agreed to organ donation.

MYTH : I'm too old to donate. Nobody would want my organs.

FACT : There's no defined cut-off age for donating organs. The decision to use your organs is based on strict medical criteria, not age. Don't prematurely disqualify yourself. Let the doctors decide at the time of your death whether your organs and tissues are suitable for transplantation.

MYTH : If I had pledged before, I can not change my mind to un-pledge later.

FACT : You can unpledge organ donation at any time. Just let us and your family know that you have changed your mind regarding organ donation pledge.

MYTH : There is religious objections to donate Organs and Tissues?

FACT : No, none of our major religions object to donate organs and tissues, rather they all are promoting and supporting this noble cause. If you have any doubts, you may discuss with your spiritual or religious leader or advisor.

**“ BECOME AN ORGAN DONOR, THIS IS THE
LAST BUT BEST GIFT YOU CAN GIVE
TO HUMAN KIND ”**

SAVRAM FOUNDATION is a non profit nongovernmental charitable organisation in India, established in 2017, which strives for bringing hope and support to the last stage patients and their family by the help, support and pledge of many potential donors. The Vision of the foundation is to eradicate reasons for shortage of organs and to spread awareness about organ donation in India, encouraging people to “Pledge to Donate” their organ after death so that lakhs of human lives can be saved every year.

WHAT IS ORGAN DONATION

Organs are the parts of body which performs a specific function in our body such as kidney, heart, lungs, eye etc. Organ donation is a surgical procedure to replace a diseased organ with a healthy organ; it is often the only treatment for organ failure.

The need of organs is very high, but on the other hand the awareness and promotional activities for organ donation is very less in India, Today, in this era of globalization people are still surrounded with misconception and myths regarding organ donation.

NEED FOR ORGAN DONATION IN INDIA

♥ Nearly 5,00,000 people are forced to untimely death every year in India due to non availability of organs.

♥ In India the country of 1.2 billion people, the PMP i.e. persons as organ donor per million population is just 0.08 as compared to 25.6 in USA, 32 in Spain.

♥ Every 2 minute a person is added to the waiting list for organs.

♥ Every year nearly 10,000 organs are illegally traded in India.

♥ Every year, around 1,00,000 people are brain dead in India.

♥ One organ donor can save up to 8 lives and help improve lives of up to 50 persons.

WHO CAN BE AN ORGAN DONOR?

Organ Transplantation and Donation is permitted by law, and covered under the "Transplantation of Human Organs Act 1994", which has allowed organ donation by live & Brain-stem Dead donors.

DECEASED OR BRAIN DEAD DONOR: Any one regardless of age, race, caste, religion or gender can become an organ donor after his / her death. Brain death is the irreversible and permanent cessation of all brain functions. When the blood and oxygen flow to a patient's brain has ceased and the brain is no longer functioning in any capacity and never will again, the patient is termed as brain dead. In such cases all vital organs continue working till life supporting systems are removed and can be donated to others.

WHY DONATE?

There are only few causes/acts in life nobler than donating our organs. Organs are the most valuable legacy one can leave behind. Instead of getting charred or returning to dust after death, the organ can give a second life to many and you die as a hero.

WHAT CAN YOU DONATE?

**“ HELP SOMEONE LIVE AFTER YOUR DEATH ”
“ DONATE ORGANS ”**

HOW CAN YOU BECOME AN ORGAN DONOR?

If you are 18 years of age you may pledge to donate your organs by signing up either online at www.savramfoundation.org or offline by filling up the donor form.
